PhishInstinct

About Us

We started in 2017 as Newtons Apple Security Solutions and transitioned to Vulnuris Security Solutions LLP in 2025. Since our inception, we have been dedicated to providing top-notch security solutions to its clients across the globe. At Vulnuris, we believe that every business, regardless of its size or industry, deserves the best possible protection against cyber threats.

Our product PhishInstinct is an innovative phishing simulation and security awareness platform designed to transform employee behavior and build a human firewall against cyber threats. By combining realistic phishing simulations, behavioral analytics, and adaptive learning, PhishInstinct enables organizations to identify vulnerabilities, train users effectively, and measure risk reduction in real time.

With its intuitive dashboard and detailed analytics, PhishInstinct enables organizations to launch realistic phishing simulations, monitor employee responses, and identify areas for improvement. By fostering a culture of security awareness, it helps reduce human error and effectively mitigate the risks associated with phishing attacks.

Problem

PhishInstinct

Human Vulnerabilities :
People still fall for convincing emails

Ineffective Training :
Traditional training methods don't change users' behaviour.

No Risk Visibility :
Management doesn't know who is most likely to click.

Sophisticated Attacks :
Phishing now looks exactly like real internal mail.

Manual Overload:
Security teams waste time on repetitive tasks.

Compliance Pressure:
Regulations demand continuous phishing testing.

Costly Mistakes : One wrong click can cause major losses

Solution

PhishinstinctRealistic Simulations

Interactive Micro Learning

Customizable Templates

Automated Campaigns

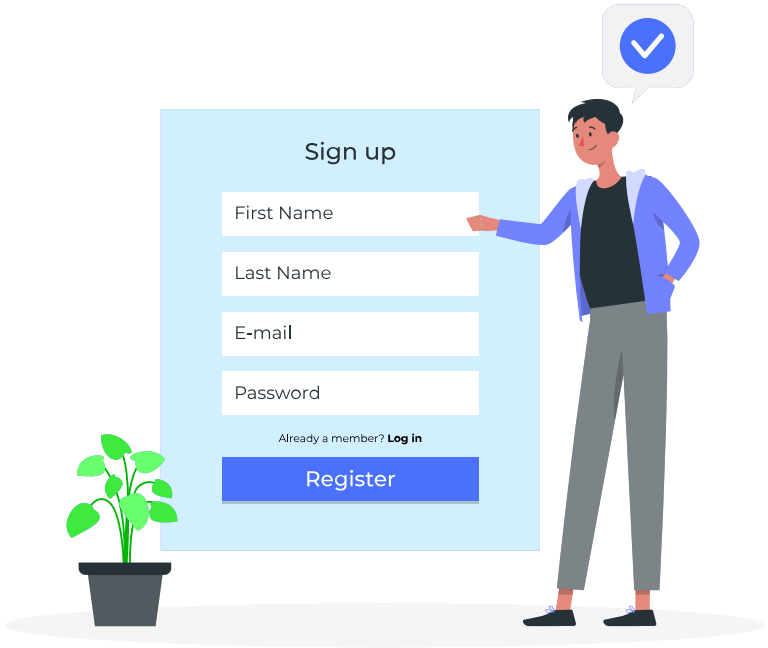
Simulation Reports

User Behaviour Analytics

Gamified Trainings

How we do it?

Phishinstinct



1. Get Access to an extensive Library of Phishing Templates
2. Upload or Create your own custom Templates
3. Add realistic Elements like Forms or Attachments

Phishinstinct Simulation Engine

4. Create Campaigns with Custom Subject and Sender Details
5. Target specific user groups or send to the entire organization at once
6. Define sending patterns using three different methods of email delivery

Advanced Analytics & Reporting

7. Send instantly or schedule for later
8. Track user interactions automatically
9. Smart visualization to analyze user behaviour trends
10. Quick reports for easy compliance
