ABOUT VULNURIS SECURITY

committed to delivering exceptional service and support to our clients.

started in 2017 as Newtons Apple Security Solutions and transitioned to Vulnuris Security Solutions LLP in 2025. Since our inception, we have been dedicated to providing top-notch security solutions to its clients across the globe. With a team of highly skilled and experienced professionals, Vulnuris offers a wide range of cybersecurity services to businesses in various sectors such as IT / ITES, Manufacturing, Healthcare, Fintech, Banking, and more.

At Vulnuris, we believe that every business, regardless of its size or industry, deserves the best possible protection against cyber threats. That's why we take a proactive approach to cybersecurity, working closely with our clients and helping them scale the security ladder.

OUR TEAMS

committed to delivering exceptional service and support to our clients.

Our Leadership Team

Mr. Mandar Waghmare
Managing Director

A visionary leader with 8+ years of cybersecurity expertise, driving strategic growth initiatives, building industry partnerships, and expanding market reach to become a globally trusted security leader.

Managing Director
Ms. Aishwarya Gore

A dynamic leader with 8+ years of cybersecurity experience, fostering innovation and enhancement of security services and product portfolios to address the evolving cyber threats.

Our Execution Team

Delivery Excellence

Mr. Sharvin

He is a results-driven leader ensuring seamless execution of our security engagements, optimizing project workflows, maintaining compliance with industry standards, and delivering exceptional client satisfaction.

Sr. Security Analyst

Mr. Prasad

He is a Certified Ethical Hacker with extensive experience in both defensive and offensive security, he specializes in penetration testing and adversary analysis, helping organizations improve their security posture.

Sr. Security Analyst

Mr. Abhishek

An experienced cybersecurity expert specializing in threat analysis and vulnerability management, providing in-depth security assessments, risk mitigation strategies, and proactive defense measures.

Jr. Security Analyst

Ms. Prajakta

She assists in security assessments, compliance initiatives, and risk analysis, supporting senior team members in implementing robust security controls and improving overall cyber defense strategies.

OUR VERTICALS

committed to delivering exceptional service and support to our clients.

CONSULTING

1. Virtual CISO
2. GRC Advisory and Audit
3. Red Teaming
4. Cyber Forensics
5. Cloud Security
6. Incident Response
7. Security Solution Design
8. Compliance & Regulatory
9. Security Training & Awareness
10. Risk Assessment & Advisory Consulting
11. ISO 27001, ISO 42000, SOC 1, SOC 2, HIPPA, GDPR, DPDP, PDPL, SAMA & other security framework consultation
PRODUCTS

1. Vaultix - Streamline Your IT Service Management
2. Phishinstinct - Train your employees and test their awareness against phishing attacks.
3. Kloudraksha - Secure, Optimize and Protect your cloud Infrastructure
4. V-Encrypt: Encrypted Traffic over IP Networks
5. V-insight - DDoS protection and Anomalies detection..

SERVICES

1. SOC – First Ever Agentic AI soc with 40+ AI Agents
2. Vulnerability Assessment and Penetration Testing
3. Code Testing As a service
4. Application testing services
5. Security Solutions Implementation
6. Security Solution Monitoring & Management
7. Network Security Management
8. OT / IoT / IoMT Assessment services
9. XST –Extended Security Team

Our Philosophy: Find, Fix, Fortify

A continuous security lifecycle that reduces attack surface and aligns remediation to risk

3

Fortify

Strengthen defenses with continuous monitoring and strategic advisory to improve controls over time.

2

Fix

Deliver prioritized, actionable remediation guidance aligned to risk for rapid, effective closure.

1

Find

Discover hidden vulnerabilities with advanced scanning, penetration testing, and AI-driven threat

Vaultix: **Unified** ITSM and Asset Management

Unified visibility, automated workflows, intelligent ticket resolution

Unified asset visibility

Single inventory for vulnerability prioritization, compliance, and incident response

Automated workflows

Reduce manual tasks and speed remediation with policy-driven automation

Intelligent ticket resolution

Faster incident closure using contextual insights and automation

Unified Asset Inventory for Complete Visibility

One platform discovering hardware, software, VMs, cloud, and unmanaged

1 **Hardware: servers, workstations, network appliances**
Agent and agentless discovery with real-time updates

2 **Software: installed apps, packages, versions**
Software inventory with lifecycle and risk context

3 **VMs and containers: host and container visibility**
Cloud and on-prem virtual assets tracked in real time

4 **Cloud-native assets: AWS, Azure, GCP resources**
Auto-discovery and ownership mapping across clouds

5 **Shadow IT and unmanaged endpoints**
Detects rogue assets to eliminate spreadsheet blind spots

6 **Outcome: Real-time inventory**
Always up to date for security operations

7 **Outcome: Ownership context**
Assigned owners, lifecycle and risk annotations

8 **Outcome: Audit-ready intelligence**
Compliance alignment with ISO 27001 and PCI DSS

9 **Integration: SIEM, EDR, SOAR and ticketing**
One-click connectors to security and workflow tools

Core Capability: **SBOM** and Supply-Chain Visibility

Automated SBOMs to reveal

vulnuris
FIND › FIX › FORTIFY

1 **Dependency map: visualized component relationships**

Automated SBOM generation and dependency mapping

2 **Vulnerability links: trace risks to specific components**

Tracks supply chain vulnerabilities for prioritized remediation

3 **License flags: identify licensing risks quickly**

Detects license conflicts and compliance exposure

4 **Regulatory alignment: support for emerging requirements**

Maps SBOM data to regulatory obligations
5 **Actionable insight: prioritize remediation across components**

Helps security leaders understand hidden dependencies

Intelligent Ticket Management for Faster

Integrated automation, SLA tracking, and audit-ready workflows

Scan

1

Continuous vulnerability and asset scanning to detect issues

Auto-ticket

2

Automatically create tickets from scan findings with context and severity

Prioritize

3

Risk-based prioritization using business impact and exposure

Assign

4

Ownership assignment to teams or individuals aligned with ITSM

SLA timers

5

Track SLAs per ticket aligned to business risk and compliance

Escalate

6

Automated escalation on SLA breaches with audit trail preserved

Industry Solutions: Banking, Government,

Compliance features and deployment modes that reduce friction and scale across clients

Banking and Fintech

PCI DSS alignment and audit-ready reporting

DORA readiness and operational resilience controls

ISO 27001 alignment for management systems

Tamper-proof logs for forensic audits

Deployment: on-premise, cloud, or hybrid

Government and Public Sector

CERT-In and RBI compliance support

Tamper-proof, verifiable audit logs

Air-gapped discovery and isolated analysis

Secure evidence collection for investigations

Deployment: air-gapped appliances or controlled cloud

MSSPs and GRC teams

Multi-tenant architecture with whitelabeling

API-first integration for automation and orchestration

Centralized reporting across client ecosystems

Scales to large client portfolios with per-client controls

Deployment: SaaS multi-tenant or dedicated instances

Integration Ecosystem and Technology Partners

Prebuilt connectors, API-first automation, and strategic technology partners

Category	Example Integrations
SIEM	Splunk, QRadar, Sentinel
EDR/XDR	CrowdStrike, SentinelOne, Microsoft Defender
Vulnerability Scanners	Nessus, Qualys, Rapid7
Ticketing	Jira, ServiceNow, Zendesk
Cloud	AWS, Azure, GCP
SOAR	Palo Alto Cortex, Splunk Phantom

API-first automation
Streamline workflows and enable programmatic control across tools.

Reduced integration friction
Prebuilt connectors speed time to value and simplify ops.

Strategic technology partners
Kali Linux, Nessus (Tenable), Phished, PortSwigger, Alnoorain, Dcode, Spiere,

End-to-end coverage
From scanning and detection to ticketing and orchestration.

Product Suite & Services

Integrated tools and expert services to build **cyber resilience**

Products

Vaultix: enterprise-focused security platform

PhishInstinct: phishing simulation and training

KloudRaksha: cloud security and config audits, multi-cloud support, automated remediation

V-Encrypt : Encrypted Traffic over IP Networks

V-insight - DDoS protection and Anomalies detection..

Services

AI SOC - Vulnuris SOC based on Agentic AI platform

Incident response: post-breach containment and recovery

Advisory: strategy, risk assessments, compliance guidance

Tailored threat intelligence: contextual, actionable feeds

Offensive security: penetration testing

Example Use-Cases

Healthcare (Middle East): challenge - regulatory exposure; solution - KloudRaksha audits and remediation; result - improved compliance and reduced misconfigurations

Manufacturing (India): challenge - production downtime risk; solution - penetration testing and advisory; result - hardened OT and fewer outages

E-Learning: challenge - credential theft; solution - PhishInstinct training and phishing tests; result - measurable reduction in successful phishing

vulnuris
FIND › FIX › FORTIFY

Why Choose **Vulnuris**: Security That Scales

Proven protection since 2017 for over 200 clients

vulnuris
FIND › FIX › FORTIFY

1 — Founded 2017 — seasoned team of ethical hackers and analysts
Built by frontline cyber defense experts

2 — 200+ clients globally secured
Proven track record across industries

3 — Real-time threat intelligence for proactive defense
Threat feeds and rapid detection

4 — Actionable remediation reports to reduce MTTR
Clear steps to fix prioritized risks

5 — Dedicated expert guidance and support
Ongoing advisory from senior practitioners

6 — Consolidated visibility across hybrid estates
Unified view for cloud and on-prem assets

7 — Reduced compliance friction and faster audits
Streamlined evidence and controls

Next Steps & Call to Action

Ready to fortify your defenses?

Schedule a Vaultix product demo

See live asset discovery and remediation workflows

Run a pilot for asset discovery

Pilot scope checklist and success criteria below

Map compliance priorities

Align discoveries to regulatory and internal controls

Define SLA-based remediation workflows

Assign SLAs and escalation paths for remediation

Contact Vulnuris sales for trial details

Follow Vulnuris sales channels for trials and support
Pilot scope checklist

Targets, asset groups, duration, success metrics

Pilot success criteria

Coverage achieved, vulnerabilities triaged, SLA met

Global Clientele
